Sample Candidate 10

candidate10@example.com | +91 90000 00010 | Hyderabad, India | github.com/sample-candidate-10 | linkedin.com/in/sample-candidate-10

SUMMARY

Machine learning engineer in training with experience shipping NLP and tabular models, from data cleaning to Dockerized deployment. Reduced inference latency by 35% in a production prototype.

TECHNICAL SKILLS

Languages: Python, SQL
ML: Scikit-learn, XGBoost, PyTorch, Hugging Face Transformers
Data: NumPy, Pandas, Matplotlib
MLOps: Docker, MLflow, FastAPI, Git

EXPERIENCE

Machine Learning Intern, Sample Analytics Pvt Ltd | Jun 2024 - Aug 2024

- Built a demand-forecasting model with XGBoost that cut weekly forecast error by 18%
- Cleaned and merged 3 SQL tables totaling 2M rows using Pandas
- Tracked 40 experiments in MLflow, which made results reproducible for a team of 6
- Deployed the model behind a FastAPI service packaged with Docker

PROJECTS

Resume Classifier

- Fine-tuned a Hugging Face Transformers model on 8,000 labeled resumes, reaching 91% F1
- Reduced inference latency by 35% by exporting the PyTorch model and batching requests
- Served predictions through a FastAPI endpoint handling 50 requests per minute

Customer Churn Prediction

- Built a Scikit-learn and XGBoost pipeline on 7,000 customers, improving recall by 12%
- Engineered 15 features with Pandas and Matplotlib error analysis
- Tracked every run with MLflow and Git

Document Search Engine

- Implemented semantic search over 1,200 PDFs with Transformers embeddings
- Improved top-5 retrieval accuracy from 62% to 81% with query expansion

EDUCATION

B.Tech Computer Science, Sample Institute of Technology, 2022 - 2026 | CGPA 8.7/10

CERTIFICATIONS AND ACHIEVEMENTS

- Machine Learning Specialization, Sample Online Academy
- Ranked 12th of 400 teams in a university ML hackathon
